**OIL COOK STOVES**

*uty! Greater Convenience! Unmatched Quality and Values!*

This fine new, fully equipped snow-white range (Model 339) establishes new standards of convenience, beauty and performance in liquid fuel stoves. It is by far the finest oil range ever built—a distinctive stove for the finest home in city or country. Equipped with extra-fast Superfex burners, its cooking ability is unequalled by any other liquid fuel stove. Finished in pure white porcelain enamel—the glass-like surface that is so beautiful and so easy to keep clean. Here's a range that you can hand down to your children.

(Detail specifications on next page.)

**World's Largest Oil Stove Makers**

# Perfections with Superfex Burners—

## The Superfine Perfections! Now Finer Than Ever!

THE latest Perfections with Superfex burners truly are the acme of Perfection. They not only are the finest of all Perfections but actually are the most attractive, convenient and safe liquid fuel stoves ever built—incomparable in beauty—unapproachable in performance.

### Model 339

(Illustrated on preceding page)

ENTIRELY new in oil stoves is the arrangement of the burners—two “Little Giant” Superfex burners in front and one “Big Giant” Superfex burner in the rear, providing a roomy cooking top that is almost square—25½ inches wide and 20½ inches deep, finished in silver-gray porcelain enamel. Sliding tray of porcelain enamel under burners, easily removed for cleaning.

Roomy built-in “Live Heat” oven, white porcelain enameled outside and dark blue porcelain inside—easy to clean; wide air space insulation; a perfect baker, equipped with built-in heat indicator. Counterbalanced drop door with easy operating positive latch; door serves as a convenient shelf when open—has concealed stop. No unsightly bolts or hinges on oven—they’re all concealed. Inside dimensions of oven, 16 inches wide, 18½ inches deep, 13½ inches high. Two Standard Superfex burners under oven. Length of range, overall, 54 5/8 inches. Weight 156 pounds.

A snow-white complete range! Three new stoves in new, lustrous, two-tone gray! Cooking tops of porcelain—the glass-like surface that is so easy to keep clean and lasts a lifetime! Body and legs finished in new, durable lacquer, *Perfectlac*, just like the up-to-date automobile! Tilting chimneys, for easy lighting! Automatic wick-control device! These are only a few of the outstanding features of the Superfex line—the world’s finest and fastest oil cook stoves.

Each model has one “Big Giant” Superfex burner, equal in cooking heat and satisfaction to a giant gas burner, and one or more “Little Giant” burners, equal to standard gas burners.

The burners are constructed on

the same principle as all Perfection burners, with the famous long chimney, which produces perfect combustion, so that a powerful column of intense heat (not flame) strikes the cooking utensils. This insures entirely odorless and smokeless heat. The Superfex chimneys have double walls, providing double draft, increased cooking heat, greater operating economy, and greater comfort, for the outer wall prevents heat radiation.

For the most satisfactory year-around cooking service, with all the conveniences of the most modern liquid fuel stove, these Perfection-Superfex stoves are without a rival.

Perfection stoves are tested and approved.

#140 00 SUPERFEX PERFECTIONS FOR SUPERIOR PERFORMANCE

Model 333, with No. 333 Cabinet

Two "Little Giant" and one "Big Giant", Superflex burners. New two-tone gray body, legs and burner chimneys — body and legs, new, durable *Perfectolac* finish; chimneys, porcelain. Cooking top is dove-gray porcelain enamel. Warming cabinet is white porcelain enamel with silver-gray porcelain end panels. Porcelain enamel sliding tray under burners. Length of stove, over all, 46 $\frac{3}{4}$  inches.

Model 332, with No. 332 Cabinet

One "Little Giant" and one "Big Giant", Superflex burners. New two-tone gray body, legs and burner chimneys — body and legs, new, durable *Perfectolac* finish; chimneys, porcelain. Cooking top is dove-gray porcelain enamel. Warming cabinet is white porcelain enamel with silver-gray porcelain end panels. Porcelain enamel sliding tray under burners. Length of stove, over all, 36 $\frac{1}{8}$  inches.

### Model 334, with No. 334 Cabinet

Three "Little Giant" and one "Big Giant", Superfex burners. New two-tone gray body, legs and burner chimneys — body and legs, new, durable *Perfectolac* finish; chimneys, porcelain. Cooking top is dove-gray porcelain enamel. Warming cabinet is white porcelain enamel with silver-gray porcelain end panels. Porcelain enamel sliding tray under burners. Length of stove, over all, 57  $\frac{3}{4}$  inches.

### The Superfex Burners

The double-wall, double-draft Superfex burners supply an abundance of clean, intense heat. Each Superfex stove has one "Big Giant" burner, equal in cooking heat and satisfaction to a giant gas burner, and one or more "Little Giant" burners, equal to standard gas burners. The chimneys tilt for lighting — a great convenience — easy to rewick.

The illustration shows the yellow-tip flame for fast cooking. Use the low blue flame for ordinary cooking.

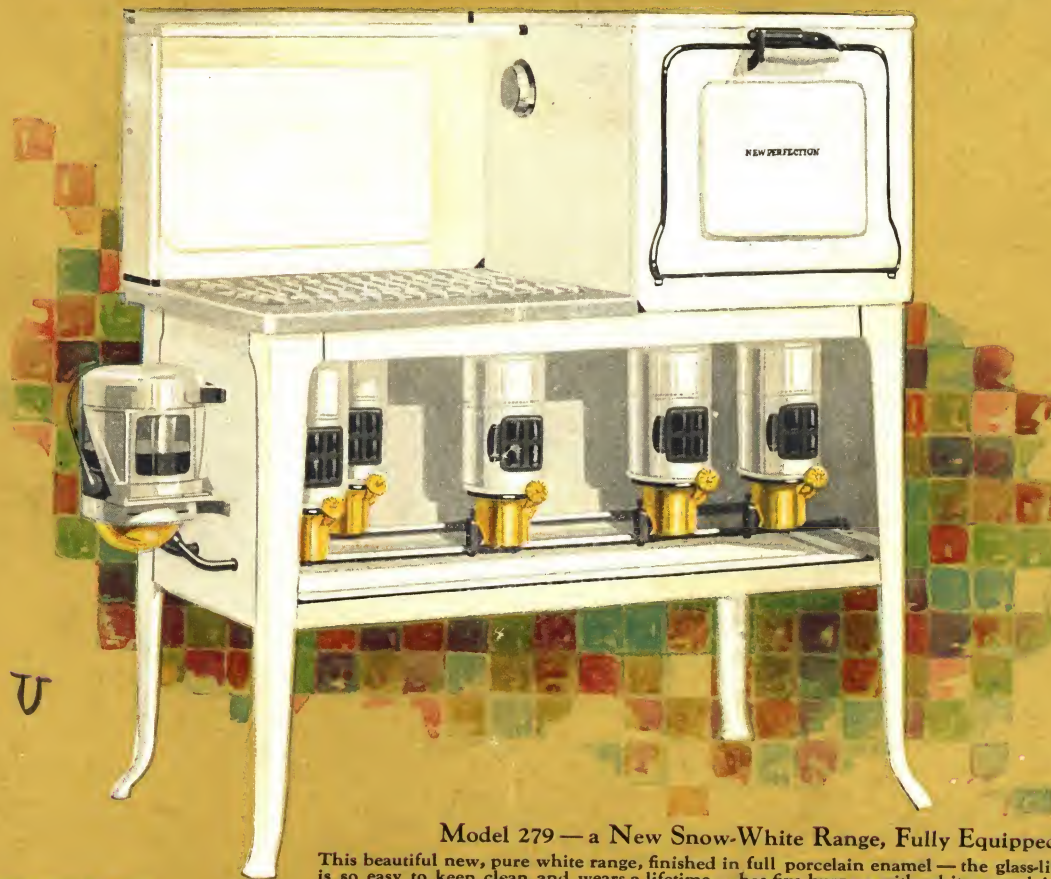

### Tilting Chimneys

The Superfex burners are equipped with a patented device that permits the chimneys to be tilted for easy lighting. Alaska handles — always cool. Patented automatic wick-stop prevents turning wick too high — resets itself as the wick burns down.

NEW STANDARDS  
OF QUALITY AND  
PERFORMANCE

#12000

## Model 279 — a New Snow-White Range, Fully Equipped

This beautiful new, pure white range, finished in full porcelain enamel — the glass-like surface that is so easy to keep clean and wears a lifetime — has five burners with white porcelain chimneys of the famous double-wall, double-draft type. Exceptionally spacious cooking top — almost square — is provided by the ingenious arrangement of the burners — two in front and one in the rear. The cooking top is 25½ inches wide and 20½ inches deep. Sliding tray of porcelain enamel under burners, easily removed for cleaning. The roomy built-in "Live Heat" Oven is a splendid baker. White porcelain enameled outside and dark blue porcelain inside. Wide air space insulation, perfect ventilation. Equipped with built-in heat indicator. Drop door, serves as a convenient shelf when open. Inside dimensions of oven, 16 inches wide, 18½ inches deep, 13½ inches high. Two burners under oven. Length of range, over all, 54½ inches. Weight 141½ pounds.

# New Stoves with Double-Wall Chimneys

## Light Colors—Porcelain Finish

THESE new *de luxe* models—the immaculate white porcelain complete range shown on the preceding page, and the four stoves on the next two pages—combine up-to-the-minute design, attractiveness and convenience in a splendid ensemble that will add distinctiveness to the finest kitchen in city or country.

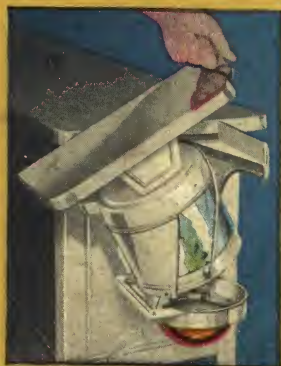

Snow-white! Silver-gray! Dove-gray! These are the popular new kitchen colors, and most appropriate they are for Perfections—the world's cleanest oil stoves.

Beautiful! Beyond comparison! But the modern home-manager desires more than beauty. She deserves modern conveniences—labor-savers. Beauty and convenience are ideally combined in these new Perfections—they are the personification of “the thing of beauty that is a joy forever.” They are lifetime stoves. Many Perfections now in use were handed down from generation to generation.

Why not enjoy a really modern oil stove? Discarding an old stove for one of these latest, more convenient and more attractive Perfections is not wasteful, it is an economy, a permanent investment that will pay liberal dividends in the form of greater leisure, a saving of unnecessary menial work.

Cooking tops, sliding trays under burners, backs of warming cabinets and the burner chimneys of these new stoves are genuine porcelain—the glass-like surface that is so easy to keep clean and lasts a lifetime.

Of the same general construction, differing only in finish and color, are the three models shown on pages 10 and 11. These three stoves have “turquoise” blue chimneys and satin-black cooking tops.

### Reversible Reservoir

No other oil stove has a fueling system as perfect and convenient as the Perfection. The glass reservoir, in which the oil level is always visible, can be easily reversed for re-fueling without soiling the hands and without stopping the burners. When

the filled reservoir is set into the fixture, the bail-handle drops down, automatically fastening the reservoir in place. Then, with one simple movement, it can be swung into operating position. This is a patented and exclusive feature of all Perfection Oil Stoves.

### Double-Wall Chimney

This view shows how streams of cool air are drawn in through the perforations around the center of the outer wall of the double-wall chimney. This air quickly becomes heated and is forced to the top of the chimney, increasing the volume of heat that strikes the cooking utensil. The double wall also acts as an insulator, preventing radiation of the heat from the sides of the chimney. This means faster cooking and a saving of fuel.

THE MODERN STOVE FOR THE MODERN KITCHEN

Model 273, with No. 273 Cabinet

Silver-gray body and legs with the new, durable *Perfectolac* finish; dove-gray cooking top and white sliding burner tray both finished in porcelain enamel. White porcelain warming cabinet with silver-gray *Perfectolac* end panels. Three burners with double-wall chimneys, silver-gray porcelain. Length of stove, over all, 42 $\frac{3}{4}$  inches.

Model 272, with No. 272 Cabinet

Silver-gray body and legs with the new, durable *Perfectolac* finish; dove-gray cooking top and white sliding burner tray both finished in porcelain enamel. White porcelain warming cabinet with silver-gray *Perfectolac* end panels. Two burners with double-wall chimneys, silver-gray porcelain. Length of stove, over all, 32 $\frac{1}{8}$  inches.

### Model 275, with No. 275 Cabinet

Silver-gray body and legs with the new, durable *Perfectolac* finish; dove-gray cooking top and sliding burner tray both finished in porcelain enamel. White porcelain warming cabinet with silver-gray *Perfectolac* end panels. Five burners with double-wall chimneys, silver-gray porcelain. Length of stove, over all, 64 inches.

### Model 274, with No. 274 Cabinet

Silver-gray body and legs with the new, durable *Perfectolac* finish; dove-gray cooking top and white sliding burner tray both finished in porcelain enamel. White porcelain warming cabinet with silver-gray *Perfectolac* end panels. Four burners with double-wall chimneys, silver-gray porcelain. Length of stove, over all, 53 $\frac{3}{8}$  inches.

YEARS AHEAD IN STYLE, BEAUTY AND CONVENIENCE

Model 172, with No. 72 Cabinet

Silver-gray body and legs with the new, durable *Perfectolac* finish; satin-black cooking top. Two burners with double-wall chimneys, "turquoise" blue porcelain. Satin-black warming cabinet. Length of stove, over all, 32 $\frac{1}{8}$  inches.

Model 173, with No. 73E Cabinet

Silver-gray body and legs, with the new, durable *Perfectolac* finish; satin-black cooking top. Three burners with double-wall chimneys, "turquoise" blue porcelain. White porcelain enameled warming cabinet with satin-black end panels. Length of stove, over all, 42 $\frac{3}{4}$  inches.

BURN OIL — THE MODERN FUEL — IN A MODERN STOVE

### Model 174, with No. 74E Cabinet

Silver-gray body and legs with the new, durable *Perfectolac* finish; satin-black cooking top. Four burners with double-wall chimneys, "turquoise" blue porcelain. White porcelain enameled warming cabinet with satin-black end panels. Length of stove, over all, 53 $\frac{3}{4}$  inches.

### No Stove is Complete Without a Warming Cabinet

A WARMING cabinet improves the appearance and convenience of the stove. The top shelf keeps food warm while the rest of the meal is being prepared. It is a convenient place to put the oven while not in use. The cabinet prevents drafts and protects walls from grease. Be sure to order your stove completely equipped with one of these convenient warming cabinets. Cabinets for all stoves (except Superfex models) are made in two styles—(1) white porcelain with silver-gray *Perfectolac* end panels, nickel trim, and (2) satin-black cabinets with nickel trim. White porcelain cabinets with satin-black end panels also may be had for three and four burner stoves. Cabinets for Superfex stoves are made in only one style, white porcelain with silver-gray porcelain end panels.

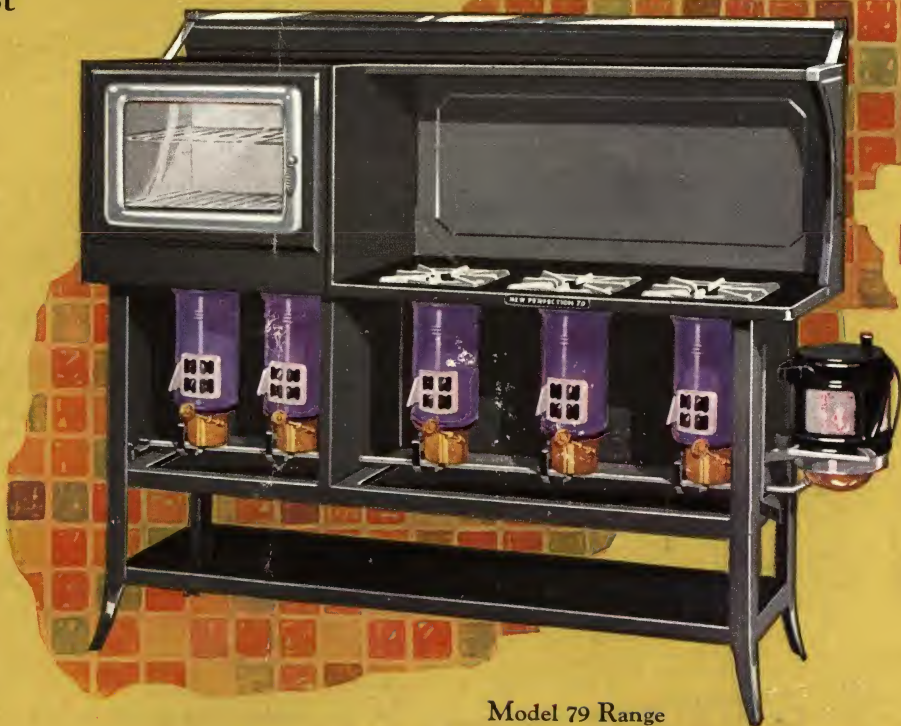

USE THE YELLOW-TIP FLAME FOR FAST COOKING

# The World's Greatest Oil Stove Values

IN design and colors—satin-black stoves with “Cobalt” blue porcelain long-chimney burners—the five models shown on this page and the following two pages retain all of the characteristics of the stoves on which the famous Perfection long-chimney burner was developed.

The finish on these stoves has been softened to a new, attractive and durable “satin-black.” Perfection warming cabinets of satin-black with nickel trim fit these models and make an inexpensive combination of the greatest utility. Cabinets of white porcelain with silver-gray *Perfectolac* end panels also are available, and for Models 73 and 74 white porcelain cabinets with satin-black ends may be had.

In cooking ability, durability and dependability these stoves, at their low price, are unquestionably the greatest oil stove value on the market.

Model 79 Range

A complete range with built-in oven. Satin-black finish, nickel trim. Five “Cobalt” blue porcelain long-chimney burners—two under oven and three in a row for cooking.

The roomy cooking top, warming cabinet shelf, base shelf and oven top provide exceptionally large working and storage space for cooking utensils.

Built-in oven of the famous Perfection “Live Heat” type, with aluminum bronzed removable linings. Inside dimensions, 18¾ inches wide, 16½ inches deep, 13½ inches high. Swing door with glass front in an attractive nickel frame; large, cool Alaska-grip handle. Two sliding racks in oven, can be arranged in four different heights. Length of range, over all, 63¾ inches.

\$78.00

NO SMOKE, SOOT OR ODOR WITH PERFECTION BURNERS

Model 75, with No. 75 Cabinet

Finished in satin-black. Five long-chimney burners finished in "Cobalt" blue porcelain enamel. Warming cabinet, satin-black, nickel trimmed. Length 64 inches.

Model 74, with No. 74E Cabinet

Finished in satin-black. Four long-chimney burners finished in "Cobalt" blue porcelain enamel. Warming cabinet, white porcelain enamel with satin-black end panels; nickel trimmed. Length 53 $\frac{3}{8}$  inches.

PERFECT FLAME CONTROL—HIGH, LOW OR MEDIUM

Model 73, with No. 73E Cabinet  
Finished in satin-black. Three long-chimney burners finished in "Cobalt" blue porcelain enamel. Warming cabinet, white porcelain enamel with satin-black end panels; nickel trimmed. Length 42 $\frac{3}{4}$  inches.

Model 72, with No. 72 Cabinet  
Finished in satin-black. Two long chimney burners finished in "Cobalt" blue porcelain enamel. Warming cabinet, satin-black, nickel trimmed. Length 32 $\frac{1}{8}$  inches.

FAMOUS FOR THEIR FREEDOM FROM TROUBLE

# Perfection Junior Stoves

Model 12

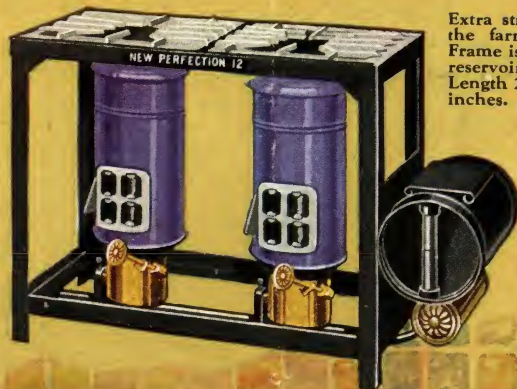

PAGE 15

Extra strong two-burner stove especially suited for the farm, laundry, creamery, lunch-wagon, etc. Frame is 16-gauge angle iron, riveted together. Tin reservoir has visible gauge. Lower reservoir is brass. Length 27 1/4 inches; depth 11 1/2 inches; height 16 3/4 inches.

Model 81B

For use on yachts and boats of all kinds. Holes in legs for fastening to deck and rails around top to keep cooking utensils from sliding off. Special yacht sleeve holds burner chimney in place. Height 18 inches; diameter 12 1/4 inches.

Model 61B

A single burner general purpose stove, especially convenient for sterilizing and making milk tests in creameries, and for dehydrating fruit and vegetables. Weighing only 6 3/4 pounds, it is easily carried wherever needed. Height 16 3/4 inches; diameter 12 inches.

Model 62B

A two-burner stove of great convenience for the small summer cottage, the creamery, lunch stands, and for many other purposes requiring dependable cooking heat. Length 22 1/4 inches; depth 12 inches; height 16 1/2 inches.

Model 11

Stands solidly on a circular base, eliminating tendency to tip even under a heavy load. Metal windshield prevents draft or wind affecting flame—especially convenient for camp purposes. Height 16 1/4 inches; diameter 11 1/4 inches.

Model 82B

For use on yachts and boats of all kinds. Holes in legs for fastening to deck and rails around top to keep cooking utensils from sliding off. Special yacht sleeves hold burner chimneys in place. Length 22 1/4 inches; depth 12 inches; height 18 inches.

# Perfection "Live Heat" Ovens

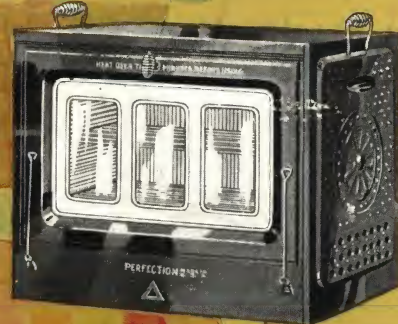

Model 122GE

Two-burner, white enameled door frame. Inside dimensions: Length 18 $\frac{3}{4}$  inches; depth 11 $\frac{3}{4}$  inches; height 16 $\frac{7}{8}$  inches.

Model 242GE

Two-burner, extra large; glass drop door; white enameled door frame. Inside dimensions: Length 18 $\frac{3}{4}$  inches; depth 15 $\frac{3}{4}$  inches; height 16 $\frac{7}{8}$  inches.

Model 142GE

Two burner, white enameled door frame. Inside dimensions: Length 18 $\frac{3}{4}$  inches; depth 11 $\frac{3}{4}$  inches; height 16 $\frac{7}{8}$  inches.

Model 122G

Two-burner, swing door. Inside dimensions: Length 18 $\frac{3}{4}$  inches; depth 11 $\frac{3}{4}$  inches; height 16 $\frac{7}{8}$  inches.

## The "Live Heat" Principle

Freshly heated air circulates around the food and is then forced out through the ventilating holes. These holes are so arranged that the heat is retained but moisture and strong odors are quickly carried away from the baking.

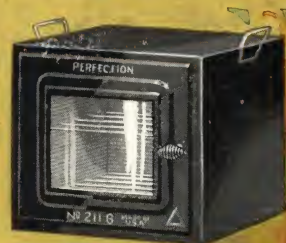

Model 142G

Two-burner, drop door. Inside dimensions: Length 18 $\frac{3}{4}$  inches; depth 11 $\frac{3}{4}$  inches; height 16 $\frac{7}{8}$  inches.

Special Air-Circulating System  
Insures Uniform Heat,  
Carries off Excess Moisture  
and Odors.

Model 211G

Junior size, glass door. Inside dimensions: Length 10 $\frac{7}{8}$  inches; depth 10 $\frac{1}{4}$  inches; height 10 $\frac{1}{2}$  inches.

Model 42G Puritan

Two-burner, drop door. Inside dimensions: Length 18 $\frac{3}{4}$  inches; depth 11 $\frac{3}{4}$  inches; height 16 $\frac{1}{8}$  inches.

Bakes Cake  
and Highly Flavored Foods  
at the Same Time  
Without Mixing Flavors.

Model 211

Junior size, all metal door. Inside dimensions: Length 10 $\frac{7}{8}$  inches; depth 10 $\frac{1}{4}$  inches; height 10 $\frac{1}{2}$  inches.

Model 121GE

One burner, white enameled door frame. Inside dimensions: Length 11 $\frac{1}{2}$  inches; depth 11 $\frac{3}{4}$  inches; height 16 $\frac{7}{8}$  inches.

Model 121G

One-burner, swing door. Inside dimensions: Length 11 $\frac{1}{2}$  inches; depth 11 $\frac{3}{4}$  inches; height 16 $\frac{7}{8}$  inches.

Model 141G

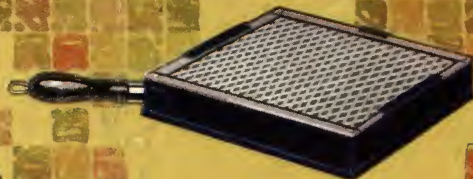

One-burner, glass drop door. Inside dimensions: Length 11 $\frac{1}{2}$  inches; depth 11 $\frac{3}{4}$  inches; height 16 $\frac{7}{8}$  inches.

### Perfection Broiler

Broils meat perfectly, without turning. Handy for baking muffins, beans, a small pie, potatoes, apples, etc. Food rests on wire rack — heat from burner strikes all parts, cooking splendidly.

### Perfection Toaster

Delicious, crisp, brown toast — four slices at a time — toasted evenly by the Perfection toaster. Keeps crumbs out of the burners. Toasts equally well on oil, pressure-gas or gas stoves.

### Extra Glass Reservoir

An extra Perfection reversible glass-bottle reservoir makes it possible to replenish fuel in the midst of cooking without interrupting the heat and without soiling the hands.

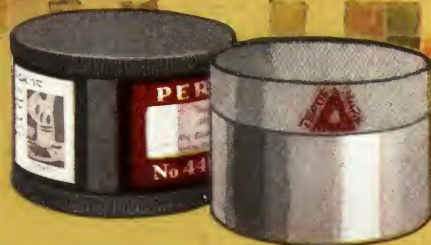

### Perfection Heat Indicator

These indicators take the "guess work" out of baking. Spring type, expanding and contracting, with dial indicating degree of heat in oven. Fits any glass-door oven — attached without tools.

### Perfection Wick-Cleaner

Furnished with all 270 line and Superflex stoves. Sold as extra equipment for any other Perfection stove.

### Perfection Wicks

Insist upon genuine Perfection wicks, stamped with a red triangle trade mark, for your Perfection stove. No other wick will give complete satisfaction. Perfection wicks are fixed to metal carriers and are trimmed, burned and ready to light. With proper care they will last for many months. No. 331 for Perfection and standard Superflex burners. No. 441 for Big Giant Superflex burners.

Use Only Genuine Perfection Wicks  
Others Cause Trouble

# Kerosene-Burning Water Heaters and Room Heaters

## Hot Water for Homes Without Gas

With a Perfection kerosene-burning Water Heater an abundant supply of steaming hot water is always available. Can be hooked up to your kitchen force pump if you have no running water system. Ask your plumber or write to factory for booklet.

Model 431 combines heater and 30-gallon "Stay Hot" storage tank with the convenience of thermostatic shut-off in one complete unit. Extra-fast Giant Superfex burner.

Model 412 is for use with standard 30-gallon tank. Two double-wall long-chimney Perfection burners. (Also two other models.)

Model 412  
Water Heater

Model 431  
Water Heater

Perfection  
Room  
Heater

## Perfection Room Heaters

For chilly fall and spring days or for extra heat in mid-winter, a Perfection kerosene-burning Room Heater gives the most heat at the least cost. Carry it anywhere! At the striking of a match it radiates clean, odorless heat—enough to heat a room in a few minutes. Nine models, including attractive porcelain enamel heaters in pure white or colors, nickel trim; also black with nickel trim. Tray attached to legs prevents marring fine floors.
